

“Quarantine Creations” - Featured Artist Signe H. Jameson

I was born, raised and taught in California.

At Cal State East Bay, it was my. Good fortune to have two outstanding ceramic professors whose personal works in ceramics, inspired my lifelong love of clay.

For 36 years, a teaching career in ceramics at Pioneer High School in Whittier was wonderful. The students were inspiring and such a joy to work with. Visiting galleries, exhibits, and purchasing catalogs, books and sculptures contained to expand my creativity with my students.

After retiring in 2004, Photoshop and Illustrator classes through Hacienda La Puente Adult Education were inspirational. They. Allowed me to be very creative in combining images for the design of note cards sent to friends and sold in the gallery gift shop.

I have been a long time member of the Whittier Art Association. Painting and sculpting for the gallery art shows have kept artistic creativity and joy in my life. Working with the Exhibition Committee has been so rewarding. People are excited to bring their work in and hanging each show is a learning experience. I get to see growth in many artists' works.

Since I do not have access to a kiln, paper cache is a fun challenging sculptural media to work with. In addiction, I continue to paint, enjoy ready fantasy novels, traveling to visit friends and relatives and downsizing my varied collections in eBay.
